

Project Executable Files

Date	15 July 2026
Team ID	SWTID-2026-7750
Project Name	Credit Card Approval Prediction System
Maximum Marks	3 Marks

Project Executable Files

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Credit_Card_Approval_Prediction/

```
|
|  └─ app.py
|  └─ prepare_data.py
|  └─ train_model.py
|  └─ requirements.txt
|  └─ README.md
|  └─ .gitignore
|
|  └─ model_comparison.csv
|
|  └─ dataset/
|    └─ application_record.csv
|    └─ credit_record.csv
|    └─ final_credit_dataset.csv
|
|  └─ templates/
|    └─ index.html
|    └─ result.html
|
|  └─ static/
|    └─ style.css
|
|  └─ model.pkl
|  └─ encoders.pkl
└─ feature_names.pkl
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	NA
Repository Link	https://github.com/nageswari196/credit_card_approval_prediction
Demo Video Link	https://drive.google.com/file/d/1GxT_bLlfs2wx7tmfrf5phQg6b0_k_mw/view?usp=sharing

Step 4: Run Instructions:

1. Clone the repository from GitHub.
2. Open the project folder.
3. Install the required Python packages using:

```
pip install -r requirements.txt
```

4. Make sure the following files are available in the project directory:
 - model.pkl
 - encoders.pkl
 - feature_names.pkl
5. If these files are not available, generate them by running:

```
python prepare_data.py
```

```
python train_model.py
```

6. Start the Flask application using:

```
python app.py
```

7. Open a web browser and visit:

```
http://127.0.0.1:5000
```

8. Enter the applicant details in the web application and click the **Predict** button to view the credit card approval prediction.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Large model files may exceed GitHub's upload limit.	Generate the model locally using train_model.py or provide the model files separately.
2	The application currently uses CSV datasets instead of a database.	Future versions can use MySQL or PostgreSQL.
3	The application is tested using the Flask development server.	Deploy the application on Render or another cloud platform.
