

Demonstration of Proposed Features

Date	15 July 2026
Team ID	SWTID-2026-7750
Project Name	Credit Card Approval Prediction System

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demo nstrate d (Yes / No)	Remarks
1	Applicant Details Input Form	Allows users to enter personal, employment, and financial details through a web interface.	Implemen ted	Yes	Successfully accepts all required applicant information.
2	Data Preprocessing	Performs data validation, feature engineering, handling missing values, and label encoding before prediction.	Implemen ted	Yes	Integrated into the Flask application.
3	Machine Learning Prediction	Uses the trained Random Forest model to predict whether the credit card application will be approved or rejected.	Implemen ted	Yes	Predictions are generated successfully.
4	Prediction Confidence Score	Displays the confidence percentage of the predicted result.	Implemen ted	Yes	Confidence score is shown on the result page.
5	Web Application	Developed using Flask with HTML and CSS to provide a simple and user-friendly interface.	Implemen ted	Yes	Application runs successfully in a web browser.
6	Model Evaluation	Compared Logistic Regression, Decision Tree, Random Forest, and	Implemen ted	Yes	Random Forest achieved the

	and Comparison	XGBoost models before selecting the best-performing model.			best overall performance.
